

love6

The number 6 is a truly great number. Given two int values, a and b, return true if either one is 6. Or if their sum or difference is 6. Note: the function `Math.abs(num)` computes the absolute value of a number.

```
love6(6, 4) → true  
love6(4, 5) → false  
love6(1, 5) → true
```
