

# countEvens

---

**Return the number of even ints in the given array. Note: the % "mod" operator computes the remainder, e.g. 5 % 2 is 1.**

```
countEvens([2, 1, 2, 3, 4]) → 3  
countEvens([2, 2, 0]) → 3  
countEvens([1, 3, 5]) → 0
```
